

//What is the name of the default folders and files that appear in the Java project folder?

the folders are .idea and src once we open .idea

//2. Name three default Java libraries included in a Java project by IntelliJ.

java.base, java.compiler, java.desktop

//3. Copy-paste or screenshot of the code that appears in the BuddyInfo.java pane
(Hello

//World implementation)

//4. The path where the file BuddyInfo.class lives

C:\Users\meada\OneDrive\Documents\3rd Year Course\SYSC 3110\Labs\Lab1

//5. The JAR file containing your completed BuddyInfo class which has a main method
that

//instantiates a buddyInfo object and displays “Hello” followed by the name of the

//buddyInfo object. This JAR file should contain BOTH the source file and the
executable.
